PRESS RELEASE - FOR IMMEDIATE RELEASE

April 24, 2009

DICA Electronics Ltd. reports a record year in 2009 with 80% revenue growth and a new expansion that more than doubles their manufacturing capacity.

Carleton Place, Ontario — April 25, 2009—DICA Electronics Ltd., a leading electronics contract manufacturer to many of Ottawa's high tech companies, has reported an exceptional year of revenue growth of 81% for their year-ended March 31, 2009 compared to 2008. These results helped DICA once again be selected by the Ottawa Business Journal as one of Ottawa's Top Ten Fastest Growing Companies. The company attributes their success to constantly improving and expanding their capabilities to diversify and grow their business by building long lasting relationships, providing superior value to customers, and offering quality services and products.

DICA continues to expand on the range of services offered to their clients to ensure that their needs are being met. In part with the success of the company and their loyal customer base, DICA has completed an almost one million dollar expansion that has increased their production facility space to double their current manufacturing capacity. As part of the expansion, DICA was awarded \$133,050 from the Eastern Ontario Development Fund (EODF), a program created by the Ontario government to promote the creation and retention of jobs, encourage business growth and to contribute to the diversification of the economy in Eastern Ontario. This funding will also assist in the creation of additional jobs over the next three years.

"Our production facility expansion will allow DICA to enhance our well-established operations and bring us up to the next level," said Spencer Grabe, President of DICA Electronics Ltd. "Since the expansion, we have been able to add another production line, increase our inventory warehouse space and add to our already world class team of industry experts. With our state of the art equipment and our innovative technology, we are able to stay on top of the competition. We have a strong competitive edge and feel that our revenue growth and the recognition as being one of 'Ottawa's Top 10 Fastest Growing Companies' for the second year in a row, sets us apart in this market.

About DICA Electronics Ltd.

DICA Electronics Ltd. was established in 1983 as a high-quality Printed Circuit Board assembly facility in response to the rapid growth in the Ottawa hi-tech industry. Since then, DICA has established itself as a valuable and reliable supplier to many Ottawa area technology companies by providing high quality and cost efficient assembly services. DICA's competitive advantage is its ability to integrate and co-ordinate it's highly skilled production team, state-of-the art production equipment, and its expansive supply chain network to provide unparalleled manufacturing services that meet not only DICA's strict quality standards, but also those of industry leaders in healthcare, industrial controls and digital imaging.
