

PRESS RELEASE - FOR IMMEDIATE RELEASE

June 2, 2009

Ottawa's Fastest Growing Contract Manufacturer, DICA Electronics Ltd., reports its 'Open House' on May 29th was a 'great success'.

Carleton Place, Ontario — June 2, DICA's Open House held on May 29th was deemed a success for this contract manufacturer. DICA opened their doors to their current customers, suppliers and some of their key partners to showcase their newly expanded 6,000 square foot addition to their production facility. With over 60 visitors, DICA was thrilled to highlight their increased capacity and production capabilities.

Those who attended the Open House enjoyed a tour of the facility hosted by Engineering and Production Team managers highlighting all of the machinery, capabilities and features that make DICA unique in this market. DICA had their SMT operators on hand running the machines and available to answer questions on any of the equipment or abilities that DICA offers. Some of the unique features that were highlighted on the tour that DICA offers to their clients are:

- Three SMT lines – One for leaded assemblies which can do 24,000 placements per hour, one for lead-free assemblies placing 24,000 components per hour and one line for quick turn 5 day prototypes that can be done as leaded or lead-free builds, placing 12,000 components per hour;
- An Automated Optical Inspection (AOI) machine which can inspect over 250,000 components per hour;
- A BGA repair station that can remove and replace lead-less devices;
- A brand new Galaxy Plus inline cleaner that will cut down on the cycle time and increase our cleaning capacity;
- Full testing capabilities from functional test to full integration;
- A process support team made up of engineering staff that are available at all times.

The event was well received and visitors were impressed with the facility and the services that we offer. If you wish to discuss DICA's capabilities in further detail, please contact sales@dica.ca or call 613-257-5379.

About DICA Electronics Ltd.

DICA Electronics Ltd. was established in 1983 as a high-quality Printed Circuit Board assembly facility in response to the rapid growth in the Ottawa hi-tech industry. Since then, DICA has established itself as a valuable and reliable supplier to many Ottawa area technology companies by providing high quality and cost efficient assembly services. DICA's competitive advantage is its ability to integrate and co-ordinate its highly skilled production team, state-of-the art production equipment, and its expansive supply chain network to provide unparalleled manufacturing services that meet not only DICA's strict quality standards, but also those of industry leaders in healthcare, industrial controls and digital imaging.
